

FOR IMMEDIATE RELEASE

Biovation Environmental Services Joins CBRE Assessment Group

*Biovation Environmental Services announces approved vendor status within CBRE's Assessment & Consulting Services Group. Able to offer faster, more cost-effective, "green" environmental services—Bioworld Remediation quickly cleans contaminated properties so that CBRE clients can **sell their contaminated properties now, not years from now!***

Jupiter, FL - July 20, 2010 – Biovation Environmental Services, LLC teams with CB Richard Ellis Group, Inc. (CBRE) within their Assessment & Consulting Services Group to provide environmental services to clients with properties affected by polluted soil and groundwater. The Assessment & Consulting Services Group is a recent CBRE initiative within their Valuation & Advisory Services Group that provides a comprehensive array of assessment services, including environmental site assessments.

"Adding environmental and property condition assessment services to our industry-leading valuation platform puts CBRE in a unique position to offer our clients true one-stop shopping," said Thomas B. McDonnell, MAI, CCIM, President of CBRE's Valuation & Advisory Services Group.

Biovation Environmental Services offers CBRE clients full-service environmental consulting and treatment equipment with improved clean-up technology effective against numerous contaminants in a variety of soil types. Dedicated to CBRE's commitment to client satisfaction, Biovation's treatment technologies are safer, faster, and more effective than traditional treatment methods to better serve their clients.

In addition, Biovation Environmental Services shares CBRE's goal for a greener tomorrow. Uncommon among commercial real estate companies—CBRE has established practices and procedures focused on the environment in their industry. In the first annual NEWSWEEK Green Ratings, published September 21, 2009, CBRE ranked 45 among the top 500 greenest US companies based on environmental performance, policies, and reputation. Biovation reinforces CBRE's green goals by offering green and sustainable treatment options to their clients.

Working with Mr. Richard Dagnall, Senior Managing Director for CBRE's Valuation & Advisory Services, (richard.dagnall@cbre.com, 713-888-4739), Biovation is among the first approved CBRE vendors providing green remedial services. Biovation Environmental Services is also approved by the State of Florida Department of Environmental Protection (FDEP) for environmental cleanups as a Florida licensed contractor and geology business.

For more information about Biovation Environmental Services, or our green treatment technologies, please contact Jim Bradley at 561-301-9260.
